# Wine Glass Tags

Creating personalized paper wine glass tags is a fun and easy way to add a unique touch to your next gathering. Whether it is for a wedding, a wine tasting event, or a casual get-together, these little tags not only help guests keep track of their drinks but also serve as charming and thoughtful decoration. In this guide we teach you how to use the crafting software to design the cut file for the tags that can then be cut with your SINGER® momento™ craft cutting machine. If you want to use Print and Cut to add text or images to your project, learn how to do it [here](). The finished size of the tag is approximately 3" x 3" (7.5cm x 7.5cm).
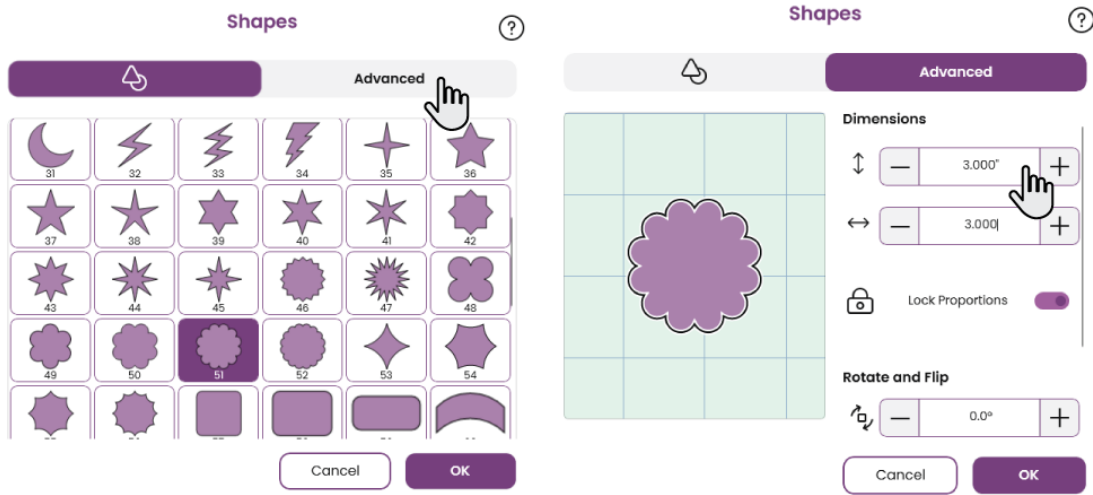

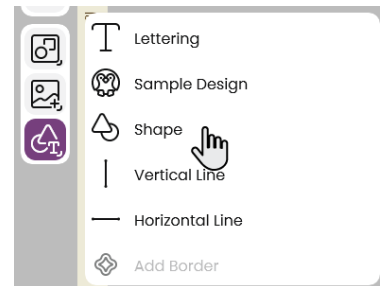

What you need

- Medium Cardstock
- Light Grip mat 12" x 12"
- Basic Blade

Directions

1. From the start page, Create a New Canvas and Custom Size. From the dropdown menu, select the size of the cardstock you are going to use (Letter Portrait/A4 Portrait).

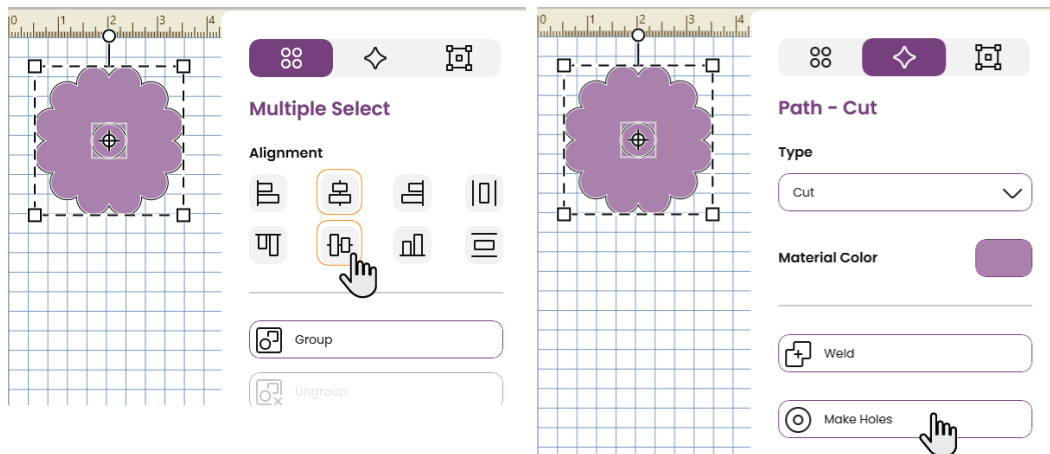

2. Add a Shape and click Advanced. We selected shape number 51 and set the size to 3" (75mm).
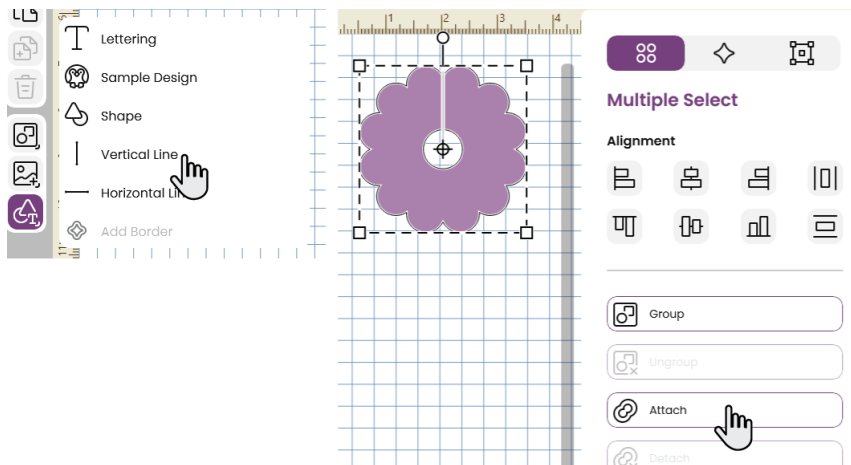

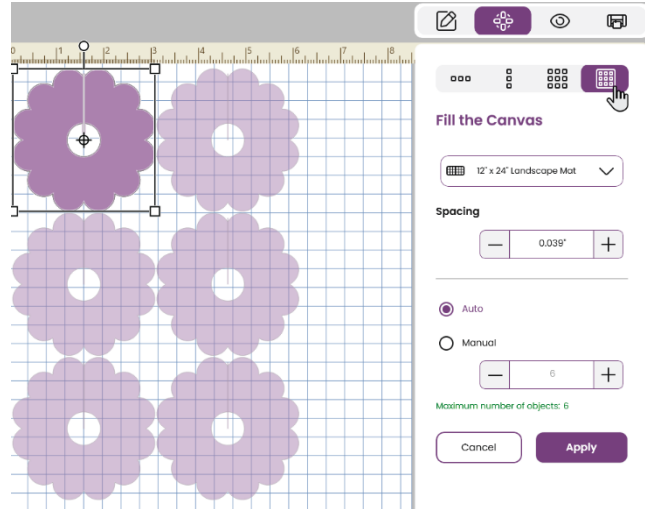

3. Add a circle and set the size to 0.7" (18mm).
